The data in the following charts are specific to your school district. The statistics can be used to help implement important strategies to eliminate the racial and gender gaps that persist across all school districts in Montgomery County.

Sources for the data are the Ohio Department of Education and the National Student Clearinghouse, with analysis provided by the University of Dayton’s Business Research Group. If data are missing for certain groups of students, that’s because the district has too few students in that particular subpopulation to create an accurate trendline.

When you review your district’s data, you may want to ask:

- Does the data surprise you?
- Who needs to know this information, so they can use it to make decisions about practices, policies and interventions for children in your community?
