The data in the following charts are specific to your school district. The statistics can be used to help implement important strategies to eliminate the racial and gender gaps that persist across all school districts in Montgomery County.

Sources for the data are the Ohio Department of Education and the National Student Clearinghouse, with analysis provided by the University of Dayton’s Business Research Group. If data are missing for certain groups of students, that’s because the district has too few students in that particular subpopulation to create an accurate trendline.

Overview data:

Children Living in Dire Poverty or a Financially Stressed Family

- **54%** of students live in dire poverty (below 100% of the FPL)
- **33%** of students live in a financially stressed family (100% to 199% of the FPL)
- **13%** of students live in families above 200% of the FPL

Source: American Community Survey 2017 5 Year Table B05010

When you review your district’s data, you may want to ask:

- Does the data surprise you?
- Who needs to know this information, so they can use it to make decisions about practices, policies and interventions for children in your community?
Every child matters: Each child’s success contributes to the success of others.

Gender: 15% of boys demonstrated readiness for Kindergarten on the KRA compared with 30% of girls. If we help 11 additional boys demonstrate readiness we close the gender gap and the overall percent demonstrating readiness increases from 22% to 30%

**“Ready to learn” is defined as scoring in the highest of 3 “bands” on Ohio’s Kindergarten Readiness Assessment, given to all children at the start of their kindergarten year.**
% Northridge kindergartners who begin school ‘ready to learn’, Fall 2017

- African American Female: 28.6%
- African American Male: 13.6%
- White Female: 27.0%
- White Male: 16.3%
Every child matters: Each child's success contributes to the success of others.

Boys: 15% of African-American boys are proficient on 3rd grade reading compared with 45% of white males. If we can help 4 African-American boys reach proficiency, we can close the gap between African-American boys and white boys.

Girls: 45.5% of African-American girls are proficient on 3rd grade reading compared with 50% of white females. If we can help 1 additional African-American girl reach proficiency, we can close the gap between African-American girls and white girls.

If we help an additional 5 African-American 3rd grade students, we close the racial gap and overall 3rd grade reading proficiency increases from 42% to 46%.

% of Northridge students who graduate from high school

Every child matters: Each child’s success contributes to the success of others.

Race and Gender Gap: 83% of African American females, 78% of African-American males and 77% of white boys graduated from high school in contrast to 92% of white females.

If we can help an additional 1 African-American female, 1 African American male and 6 white males graduate, we can close the racial and gender graduation gap and the overall graduation rate would increase from 84% to 91%.
